

TimberLab L-BOND® PROJECT PANEL

Overview

L-BOND® Project Panel is a timber panel designed for use in various interior design applications and can be utilised by joiners / carpenters to satisfy a number of end products. Its vertically orientated 3mm thick veneers provide a unique finish with strong linear pattern. The panel is a solid timber product so it can in most cases, be self-supporting.

Applications

Furniture: Desks/Workstations, Bench Tops / Counters for commercial and residential applications.

Partition / Feature Walls: Office partition walls or feature panels to entry's / lobbies.

Retail: Shelving and product displays

Availability

Panels are made on a per project basis to suit specific sizing requirements, although we can make special sizes to suit your requirements. We do have standard sizing as listed below which can normally be produced within 7-10 working days.

Width	Depth	Length (M)
300	20/42/58/70	2.4, 3.6, 4.8, 5.4, 6.0
400	20/42/58/70	2.4, 3.6, 4.8, 5.4, 6.0
600	20/42/58/70	2.4, 3.6, 4.8, 5.4, 6.0
1200	2042/58/70	2.4, 3.6, 4.8, 5.4, 6.0

Options

Various detailing can be provided to suit the needs of your end product.

- Tongue and Groove edges for jointing
- Central (hidden) rebates for wiring/cables
- Further staining/coating options can be completed by your carpenter/joiner as well as additional detailing, e.g. rebates for lighting panel shaping, bevelled or rounded edges.
